

AUTHENTIC

RECLAIMED

BROCANTE

Lightly Brushed, Slightly Textured, Matte Finish
Live Sawn Reclaimed Oak

Authentic Reclaimed provides carefully curated new and reclaimed wood products, with modern finishes, for architectural specifications.

We provide only the highest quality materials, milled to our exacting standards and finished to enhance the natural beauty of the wood. Our low-VOC matte oil finish penetrates deep into the wood; as it cures it hardens, forming a protective barrier against wear and dirt. Unlike traditional top-coat finishes, our oil actually becomes part of the wood.

Our extensive offering includes both solid and engineered profiles, available in wide planks, long lengths and suitable for flooring, wall and ceiling treatments.

Natural Material Statement:

As with all natural materials, Authentic Reclaimed's products can be expected to have naturally occurring characteristics and color tone variations. Fluctuating acidity levels within the wood, differing harvest times and locations, as well as tolerances within the color finish application process all affect the finished product. The degree of natural color variation, often referred to as "range", can vary from production batch to production batch and product to product.

These characteristics and variations are inherent in hand-made and natural materials such as ours. As you consider your surface material selection, please note that color range is a natural characteristic of authentic wood surfaces and is to be expected.

WHAT TO EXPECT:

COLOR VARIATION/RANGE

FILLED KNOTS

NAIL HOLES, SURFACE CHECKS, OVER-WOOD

VISUAL CHARACTERISTICS

SPECIES: Reclaimed White & Red Oak

SURFACE TEXTURE: Brushed with kerf saw

OPEN GRAIN: No

KNOTS: Yes **KNOT SIZE:** Small to Large

COLOR RANGE / VARIATION: Low / Medium / Extreme

MILLING: Tongue & Groove / End-Matched

FINISH: Matte Low-VOC Penetrating Oil

GRADE: Reclaimed

EDGE PROFILE: Eased Edge

PROFILE: 5/8" Thick- 4 mm Wear Layer

RANDOM LENGTHS: 2' - 8'

RANDOM WIDTHS: 5 1/8" and 7 1/2"

STRUCTURE: Engineered

INSTALLATION: Nail-Down, Glue-Down
